# Correction to: Depletion of regulatory T cells increases T cell brain infiltration, reactive astrogliosis, and interferon- $\gamma$ gene expression in acute experimental traumatic brain injury

Tobias J. Krämer<sup>1</sup>, Nathalia Hack<sup>1</sup>, Till J. Brühl<sup>2</sup>, Lutz Menzel<sup>1</sup>, Regina Hummel<sup>1</sup>, Eva-Verena Griemert<sup>1</sup>, Matthias Klein<sup>2,3</sup>, Serge C. Thal<sup>1</sup>, Tobias Bopp<sup>2,3</sup> and Michael K. E. Schäfer<sup>1,3,4\*</sup> 

**Correction to: J Neuroinflammation (2019) 16:163**  
<https://doi.org/10.1186/s12974-019-1550-0>

Following publication of the original article [1], the authors opted to correct the following mistakes. According to the title and our results, the conclusions in the abstract and at the end of the discussion the term “attenuates” must be corrected to read as “increases”.

Published online: 07 September 2019

## Reference

1. Krämer TJ, Hack N, Brühl TJ, Menzel L, Hummel R, Griemert E-V, Klein M, Thal SC, Bopp T, Schäfer MKE. Depletion of regulatory T cells increases T cell brain infiltration, reactive astrogliosis, and interferon- $\gamma$  gene expression in acute experimental traumatic brain injury. *J Neuroinflammation*. 2019;16:163 <https://doi.org/10.1186/s12974-019-1550-0>.

1. Conclusions (Abstract): “The results show that the depletion of Tregs increases T cell brain infiltration, reactive astrogliosis, interferon- $\gamma$  gene expression, and transiently motor deficits in murine acute traumatic brain injury”.
2. Conclusions (Discussion): “Thus, depletion of Tregs increases acute immune responses in the brain and Tregs may serve a critical function in modulating the pathophysiology of TBI”.

The authors apologize for the inconvenience caused.
